

The specialist for high-speed applications

SICK
Sensor Intelligence.

Technical data overview

Functional principle	Optical detection principle
Fork width	2 mm ... 225 mm (depending on type)
Fork depth	40 mm ... 95 mm (depending on type)
MDO	0.2 mm
Light source	LED, infrared, Infrared light LED, infrared, Infrared light ¹⁾ LED, infrared, Infrared light ²⁾
Switching frequency	10 kHz ³⁾ 15 kHz ³⁾ 10 kHz ⁴⁾ 0.5 kHz ⁴⁾
Response time	100 µs 46 µs ⁵⁾ 50 µs ⁵⁾ 30 µs ⁵⁾ 1 ms ⁵⁾
Output function	Light/darkswitching, selectable via button / Light/dark-switching, adjustable via reverse polarity (depending on type)
Connection type	Male connector M8, 4-pin Cable, 4-wire 0.2 m Cable open end 300 mm
IO-Link functions	- / ✓, —standardAdvanced
Advanced functions	— High speed counter + decentralized debouncing Time measurement + decentralized debouncing (depending on type)

¹⁾ Continuous.

²⁾ Pulsating.

³⁾ With light/dark ratio 1:1.

⁴⁾ With light/dark ratio 1:1, without timer stage.

⁵⁾ Signal transit time with resistive load.

Product description

WFnext fork sensors are at work in the detection of labels, marks, double sheets, holes, edges, and various objects. Thanks to the design principle that sees both the sender and receiver integrated in a single housing, no adjustment is necessary. This easy-to-use sensor line includes fork widths between 2 mm and 120 mm with fork depths of 40 mm, 60 mm, and 95 mm. Extremely fast response times and fine resolution means that WFnext fork sensors from SICK can even detect small and flat objects, as well as those traveling at high speeds.

At a glance

- Infrared light source
- Simple and precise setting of the switching threshold via IO-Link, teach-in button, or plus/minus buttons
- Fast response time: 100 µs
- PNP and NPN switching output
- Light/dark switching function
- Stable aluminum housing with IP 65 enclosure rating
- Smart sensor with integrated IO-Link interface

Your benefits

- Fast response time and fine resolution ensure reliable detection even at very high object speeds
- Infrared light source provides excellent ambient light immunity
- User-friendly setting via IO-Link, teach-in button, or plus/minus buttons
- A wide range of different fork sizes enables flexible installation
- Stable aluminum housing for use in harsh industrial environments
- Thanks to IO-Link or external teach-in, the switching threshold can be adapted while the process is running, increasing process reliability
- Easy to access data from the PLC via IO-Link

Fields of application

- Detecting edges, holes, and objects in production processes at high speeds
- Monitoring the presence of different objects
- Detecting opaque labels

SICK AT A GLANCE

SICK is one of the leading manufacturers of intelligent sensors and sensor solutions for industrial applications. A unique range of products and services creates the perfect basis for controlling processes securely and efficiently, protecting individuals from accidents and preventing damage to the environment.

We have extensive experience in a wide range of industries and understand their processes and requirements. With intelligent sensors, we can deliver exactly what our customers need. In application centers in Europe, Asia and North America, system solutions are tested and optimized in accordance with customer specifications. All this makes us a reliable supplier and development partner.

Comprehensive services complete our offering: SICK LifeTime Services provide support throughout the machine life cycle and ensure safety and productivity.

For us, that is “Sensor Intelligence.”
